

I have never been a fan of Commercial Radio because they only play what they think I need, or want to hear. When "underground FM" flourished, I was happy to listen until public radio simply became an outlet for mostly information ie. news instead of music. I simply shut it off. Commercials make me crazy. I love my satellite radios (I have 3) and I wish them to continue on with their expansion as planned. I will pay the money NAB is out of touch with everyone except their source of funding. Make them go away. Thank you
